Is this the Third Influenza Wave?

Is the type of heavy cold now prevalent a true influenza? Doctors disagree.

It will be remembered that after the terrible epidemics of 1918 and 1919, it was predicted that "waves" of influenza would recur, milder each time, until humanity should have acquired immunity against the disease.

Science has not yet found the germ, nor medicine the cure. But we have learned better how to avoid influenza, grip and pneumonia.

The value of Vicks as an aid in preventing these diseases is explained below.

Avoid Influenza---Grip---Pneumonia

Apply Vicks to help avoid infection.

Use Vicks at the first sign of an oncoming cold.

MOST medical authorities now agree that Colds, Grip, Influenza and Pneumonia are all germ diseases—most commonly spread by breathing in the germs. If the system is in good shape—the membrane of the air passages in a healthy condition—these germs do not breed.

In fact the germs of all of these diseases are frequently found in perfectly healthy persons. It is only when the bodily resistance is lowered—as by a cold for instance—that they are able to harm us.

Avoid Sneezers and Coughers

It is best to keep away from the sneezers and coughers in the street cars and public places, or if you must meet them, insert some Vicks in the nostrils before you start out. On returning home, melt a little Vicks in a tin cup or a spoon and inhale the vapors.

Opposed to Bacteria

The ingredients of Vicks are not only anti-septic, but rubefacient—that is, they summon the blood to the tissues where applied and this free blood circulation is nature's best method of repelling germ infection. Also Vicks spreads a protective film over the membrane and furthermore is opposed to the growth of bacteria. In short, we believe you have a much better chance to avoid infection by these numerous germs if you have Vicks in your nose.

Adopt the DIRECT treatment for all cold troubles

ABSORBED, like a liniment, and, at the same time, INHALED, as a vapor, Vicks reaches immediately the congested, inflamed air passages.

Three Sizes: 35c; 75c; \$1.50

Attack a Cold Immediately

When you feel a cold coming on, go right home. Take a laxative. Make some hot lemonade, then take a hot bath—as hot as you can stand. Stay in the tub 30 minutes, sipping slowly several glasses of the lemonade. Get into bed, with a hot water bottle at your feet, and pile on blankets. After an hour's sweat, dry thoroughly with a rough towel, apply Vicks over throat and chest, rub in well until the skin is red, and then spread on thickly and cover with one or two thicknesses of hot flannel cloth. Get into bed again between dry sheets. Leave the bedclothing loose about the neck, like a funnel, so that the rising vapors may be freely inhaled. It is an obstinate cold, indeed, that will resist such treatment. If it does, call a physician.

Acts Two Ways At Once

Vicks is of benefit in cold troubles in two ways. 1st—It is absorbed thru and stimulates the skin, thus helping to relieve the soreness, loosen the phlegm and make the breathing less difficult. 2nd—At the same time the ingredients, released as vapors by the body heat, are taken with each breath directly into the congested, inflamed air passages.

A Vapor Lamp in Salve Form

Vicks is the discovery of Mr. L. Richardson, a North Carolina druggist. He realized that cold troubles were affections of the respiratory organs and that the only way to get medication direct to these parts was in the form of vapors. Mr. Richardson finally worked out the process for making Vicks, so made that the body heat

releases the volatile ingredients in the form of vapors. Vicks really is "a vapor lamp in salve form."

The Ingredients of Vicks

Since the dawn of history mankind has been searching nature for remedies against cold troubles. The knowledge gained thru a thousand years has come down to us today. Vicks contains the best known remedies for these troubles, some of them of great antiquity. Menthol, for instance, comes from Oil of Peppermint which was grown in Egypt three thousand years ago and whose virtues are described in the old Icelandic books of the 13th century.

The highest authority on drugs and their uses is the U. S. Dispensary. We give below a few extracts from the Dispensary on some of the ingredients in Vicks.

MENTHOL—"It is actively anti-bacterial. It is employed for its antiseptic and anesthetic influence in coryza, pharyngitis and laryngitis."

CAMPHOR—"Has a peculiar and agreeable effect on the mucous membrane—relieves congestion and inflammation—is a powerful stimulant to the respiratory centers."

OIL OF EUCALYPTUS—"Germicidal, antiseptic and stimulant—largely used in chronic bronchitis and infections of the upper respiratory tract—its vapors are very efficient."

OIL OF THYME—"This drug is a powerful antiseptic with wonderful healing properties, especially in congestion and catarrhal conditions of the nose and throat."

OIL OF TURPENTINE—"Its vapors are an excellent remedy for, and highly beneficial in, various forms of bronchial and lung troubles—has powerful heating, antiseptic properties."
